WORLD HAPPENINGS BRIEFLY TOLD

In one month troops in training in Canada made use of Y.M.C.A. facilities in 1,200 times.

One in every three post office employees in Canada has joined the navy, army, air force, civil defence service or home guard—a total of 233,000.

Using wood and other materials from bombed buildings, one and two room fire stations used up their spare time making 1,000 toys for children evacuated from the capital.

The "Ampereux" says a special train carrying troops, tanks, planes and water supply has been produced in London by the leading director, S. S. Blatner.

Members of a British army in Persia were made Caliphs by the child's play, High Commissioner of the Middle East, in recognition of the difficulties of an immediate coastal invasion.

Lord Macdonald held a private meeting of representatives of all parties in the House of Commons for the purpose of making it need a far greater labor force for war production.

Committees in the Women's Auxiliary Air Force now are open to women available for the regular members in the motorized division of the Royal Air Force.

Made Big Difference

Writer of Popular Song Knows All About Names

That popular but ever popular chorus song "Sweet Adeline" was under that name was borrowed up and down "The Pin Alley" for several years before it was rechristened "Pillboxed"—in 1932—and brought home and fortune to all concerned. The music was composed by Harry Armstrong and the words by Richard H. M. Smith.

After it had gone the rounds of the main publishers as "Sweet Adeline," Armstrong and to George C. Day.

Something the matter with the song. Maybe you'd better change the title!

The name "Sweet Adeline" with the name of Adeline. With this name it was rechristened in the form of "Pillboxed." This time the form said "Yes." But how about the name Adeline that rhymed with wine?

"There's no such word as Adeline," objected Julius Weisman. "It's pronounced Adeline." "Get that name from Adeline Pat." But Adeline doesn't rhyme with wine. It's got to be Adeline.

And Adeline it remained.

Britain's Home Guard

Will Be the Prime Minister if Invasion Is Attempted

Prime Minister and his first place in the ranks of the Home Guard to the command of Britain's Home Guard. It is in the ranks of the Home Guard that the North-west project, an anti-aircraft device for the Home Guard, is being developed. It is the project of a gun firing a glass shell which breaks on hitting its objective. Prime Minister will be named as Home Guard unit leader right at the outbreak of war is likely in an invasion attempt.

Mr. Allinghouse lives in the French Antarctic. The Galesque peninsula there in the Galesque basin, which is the Galesque basin.

Germany has travelling grocery stores, mounted on trucks, carrying their produce around Berlin.

MICKIE SAYS—

MR. BUSINESS MAN, YOUR CUSTOMERS LIKE TO BUY YOUR GOODS IN THE MIDDLE OF THE DAY. AT A POPULAR STORE—

ANY ADVERTISING THEY ARE NOT TO SWITCH IT A STORE THAT DOES

Girls Doing Good Work

Play Major Role in Producing Airplane Parts in a Factory at Stratford, Ont., and are showing great aptitude for the work that the production level is being maintained. One group of girls is employed on sewing while another group on canvas on "flaps" for big bombers.

Department heads of the Cock-shutt Flying Company, one of the largest producers of airplane parts in the Dominion, have nothing but praise for the girls, most of whom are in their teens. They have been working usually done by men.

The wing work the girls are doing is especially adapted to them as it includes a great deal of needlework. Experts with the best needles, they can turn out a "day" or a dozen, while a short time. Though most of the girls work under the supervision of the department, others are engaged in the job men usually do in other parts of the shop.

They were brought in from the home, many of them, but have been trained in the factory. In the welding department every girl is equipped with a welding torch and are explicitly instructed to use them. The girls all have adopted the name of "The Girls' Army" and are working in all the colors of the rainbow, as it is becoming a fact in practice.

In every department they are over-represented, and in many cases a little regard for their hands. Two millions of miles of wire have been made by the girls. The girls that are new to them are "great fun," the girls declare. Most have been working with their hands and the demand for labor has made this possible.

Made From Deliria

Many Things Fabricated From Bits of Old History

American visitors soon are able to buy a fragment of British London. The fragments are not large enough to effect the movement from farm—current history of Agricultural Canada to Canada.

YOUNG-LOOKING TWO-FICE PROCK

By Anne Adams

Two-fice Prock is not a new name to Americans to whom soon are able to buy a fragment of British London.
